Ditton**

Natural, elegant and durable

Mouldings • Stairs • Indoor and outdoor siding

Natural and ecologic oils 

Ditton Wood specializes in the manufacture of mouldings, stairs, indoor and outdoor siding.

Ditton offers high-quality, durable products for the house of your dreams or your cottage, country home, business or renovation project.

Our company is devoted to contributing to a healthy future, thus our products have natural, ecologically friendly finishes.

Wood is a more appealing choice than ever when combined with environmentally friendly finishing and maintenance products.

Manufactured in Quebec

Natural and ecologic oils

Ditton Wood is concerned to save the planet and to ensure a better quality of life for everybody today and for future generations.

Our wood flooring is environmentally friendly:

- Natural and ecologic oils
- Little energy is consumed since the wood is purchased locally rather than overseas for floors made in China and exotic woods
- Our wood is highly durable (from generation to generation) compared to floating floors, ceramic tiles and carpets
- Our factory takes great care to minimize losses in wood processing. We use as many scraps as possible in manufacturing our products
- Manufactured in Quebec
- Natural product (wood and natural oils) containing no products that are harmful to health

Environmental protection and conservation.

Mouldings

*Personalize
your decor*

Colonial model

A harmonious look with warm décor and personal style

Decorative door, ceiling and floor mouldings are increasingly popular inside homes.

Basic decorative elements that enhance the personality of your home.

We have a vast selection of wood mouldings to decorate your rooms (Ogee, framing, baseboards, picture rails).

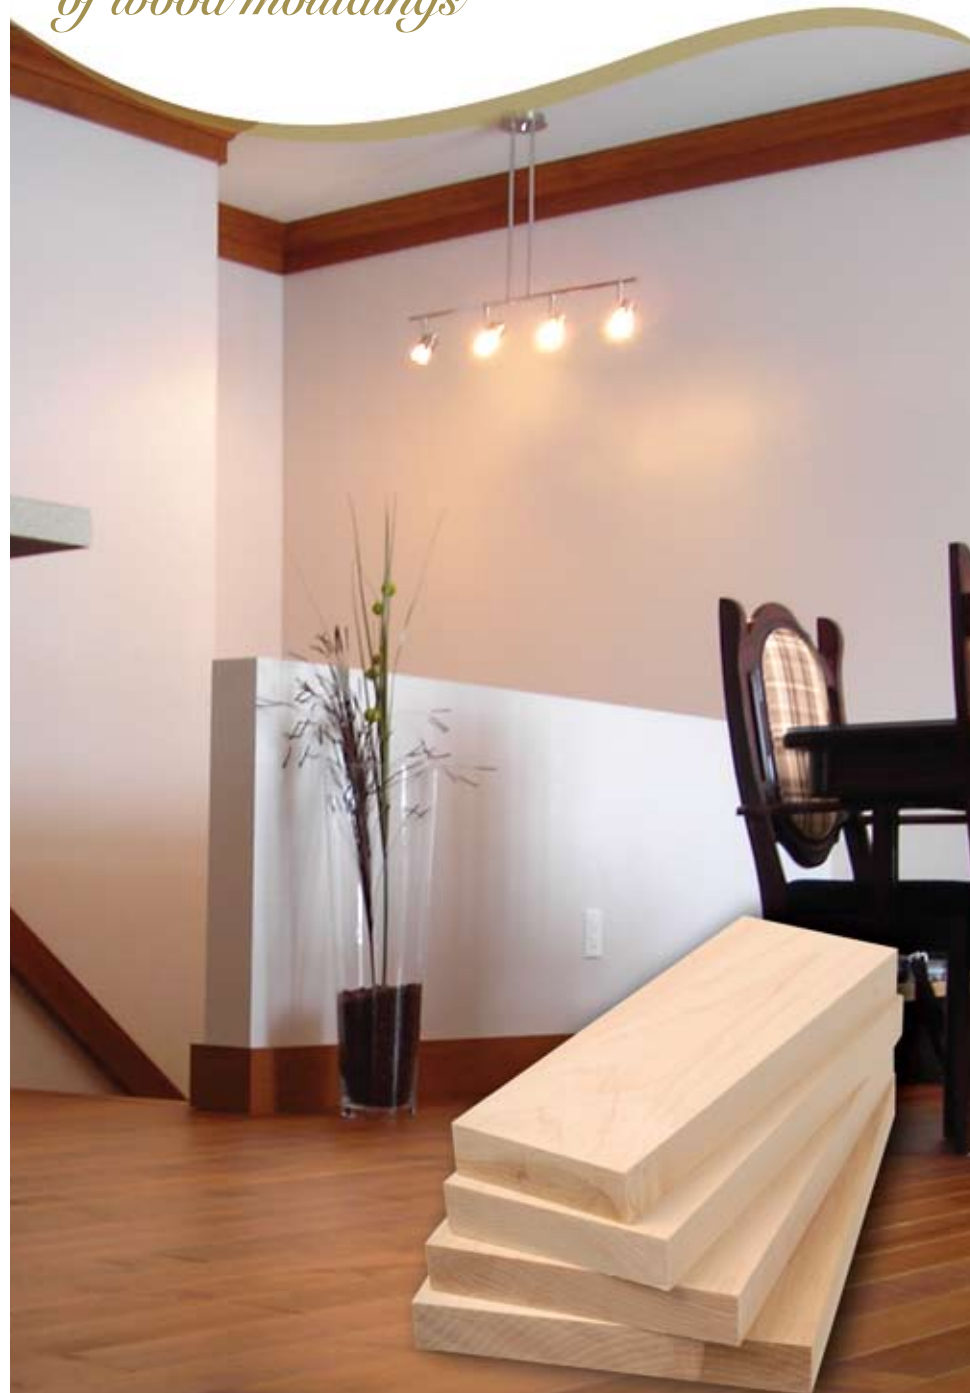

- Finishing: pre-oiled
- A variety of species and colours
- Colonial model for a classical style and square model for a contemporary style

Visit our website for species and colours

Our mouldings can be matched with our pre-oiled floors, wooden stairs and indoor siding.
